

Foundations of Community Engagement Modules

Foundations of Community Engagement is a series of modules designed to build students' core skills and knowledge related to central principles of community engagement. There are 3 modules:

1. Foundations of Community Engagement
2. Deconstructing Power and Privilege in Communities
3. Building Effective Community Partnerships

The modules can be completed at: <https://completestudent.ca/login/>

To earn a *certificate in the Foundations of Community Engagement:

1. Go to the following link: <https://completestudent.ca/login/>
2. Go to REGISTER NOW - Create an account (we recommend using your Western student login and password)
3. Log in and select "Community Engagement"
4. Complete each of the modules on your own time
5. When all three modules are completed, you will be eligible for the certificate.

*Please note: The certificate for the Foundations of Community Engagement modules is currently temperamental. It seems as though using Firefox browser helps but is not the overall solution. We are working on fixing this problem with the parent company housing the modules. In the interim if you require proof of completion, simply screenshot the completion page. You can also add that you have completed the modules to your resume/portfolio even without the certificate. Thank you for your patience and understanding with this matter.
