WHAT IS EXPERIENTIAL LEARNING?

Experiential Learning can be broadly characterized as “learning by doing” or “applied learning” or learning through “trial and error”.

Experiential learning exists when a personally responsible participant cognitively, affectively, and behaviourally processes knowledge, skills and/or attitudes in a learning situation characterized by a high level of active involvement (Hoover and Whitehead, 1975).

Research carried out in the cognitive sciences reveals that students learn academic course concepts more deeply when they are able to apply abstract concepts (theory) to concrete points of reference (experience; Eyler, 2002, p. 520-521).

KOLB’S MODEL OF EXPERIENTIAL LEARNING (1984)
WHAT IS COMMUNITY ENGAGED LEARNING?

The Carnegie Foundation for the Advancement of Teaching defines “community engagement” as “collaboration between institutions of higher education and their larger communities (local, regional/state, national, global) for the mutually beneficial exchange of knowledge and resources in a context of partnership and reciprocity” (Carnegies Foundation for the Advancement of Teaching). The purpose of “community engagement” is to build partnerships wherein college and university knowledge and resources can be shared with those in the public and private sectors. These partnerships can contribute to (Carnegie Foundation for the Advancement of Teaching):

- enrich scholarship, research, and creative activity;
- enhance curriculum, teaching and academic learning;
- prepare students to serve as educated and engaged citizens;
- strengthen democratic values and civic responsibility;
- address critical societal issues; and,
- contribute to the public good.

At Western University, Community Engaged Learning (CEL) is used to describe pedagogical approaches that aim to achieve both academic and civic outcomes for students, while making a meaningful contribution to both local and global communities through reciprocal partnerships. In this way, CEL is a form of experiential learning that places students in partnerships with community and industry partners, and includes elements of Community engaged learning (CEL), Community Based Research (CBR), and Community Engaged Scholarship (CES).

HOW DOES CEL DIFFER FROM OTHER FORMS OF LEARNING?

Community Engaged Learning differs from traditional forms of learning because it brings course content to life by providing students opportunities to apply their course-based knowledge within real-world settings. CEL also endeavors to instill a sense of civic engagement and social responsibility in students. Through their CEL experience and reflection students learn “socially responsive knowledge” affording them the skills necessary to identify and provide solutions for social problems.
Community Engaged Learning is not about the addition of engagement to learning, but rather the integration of engagement with learning. In these settings, the students’ observations and experiences in the community are as integral to the students’ academic learning as class lectures and library research (Howard, 1998, p. 21). Through their engagement experiences and reflection, academic learning is informed and transformed, and the academic learning informs and transforms the engagement experience, creating a reciprocal relationship between service and learning (Howard, 1998, p. 21).

To be clear, community engaged learning is not an internship or a volunteer role. CEL students differs from both volunteer roles and internships in that their service engagement is completed in conjunction with their academic course as part of their grade, whereas volunteer work is not associated with academic work and internships are typically stand-alone learning experiences without a substantial class component.

**HOW DOES PARTICIPATING IN COMMUNITY SERVICE LEARNING BENEFIT THE STUDENT?**

**CEL has been found to afford students the following benefits:**

- Increased interest and understanding of course material and its application
- Promotes civic engagement and social awareness and responsibility
- Strengthens individuals attachment to their community
- Students recognize their own integral role in the growth of their community
- Gain hands-on experience in the non-profit sector
- Develop personal, professional, and intellectual skills
- Enhance critical thinking and problem solving skills
- Develop and fine-tune communication, collaboration, and leadership skills
- Learn more about social issues, their root causes, and potential solutions
- Opportunity to meet interesting people and expand networks
- Build connections that can potentially lead to future employment

In addition, an empirical study conducted at the University of California found the following 11 areas to be positively affected by students’ involvement in CEL (Astin et al., 2000):

<table>
<thead>
<tr>
<th><strong>ACADEMIC PERFORMANCE</strong></th>
<th><strong>VALUES</strong></th>
<th><strong>SELF EFFICACY</strong></th>
<th><strong>LEADERSHIP</strong></th>
<th><strong>GRADUATION</strong></th>

</tbody>
</table>

In addition, an empirical study conducted at the University of California found the following 11 areas to be positively affected by students’ involvement in CEL (Astin et al., 2000):
WHAT FORMS CAN COMMUNITY SERVICE LEARNING TAKE?

Community Service Learning can take two forms:

**PLACEMENT-BASED CEL**

This type of CEL involves the student going to work within the organization for a set amount of hours, and on a set weekly schedule. The intention of a placement is to have the student fully immersed in the day to day functions of a community partner organization. Students can be involved in any kind of work deemed suitable by the organization, with intention that students’ involvement directly connect to the course content and learning objectives.

It is also possible for students to take on special, independent projects that meet an organizations need during their placement hours. It is our hope that students will become fully oriented within the organization such that they become familiar with the site location and all projects and endeavors undertaken by the organization.

**PROJECT-BASED CSL**

This type of CEL usually involves students working in groups of approximately 3-10 students to complete a project that fulfills a need for the partnering community organization. This format differs from a placement, as most of the work is completed independently and off-site from the organization. With these partnerships, community supervisors act as a resource to the student(s) and set the scope of the project being undertaken.

Projects should have tangible outcomes for both the student and the organization. It is our hope that students will become acquainted with the organization through a volunteer orientation and site tour, and understand and participate in some of the ongoing projects and endeavors undertaken by the organization.
WHAT KIND OF THINGS WILL I BE INVOLVED WITH AT AN ORGANIZATION?

CEL students are involved in a broad range of community organizations that provide an entire spectrum of services including but not limited to social services, sports and recreation, arts and culture, education and research, and environmental causes. What students will be doing for the organization will depend on the course objectives, CEL format (project or placement), and the needs of the partnering organization.

Whereas some students might be creating an awareness campaign for an environmental issue, others could be supporting, tutoring, or mentoring disadvantaged populations. Students have also been involved with event coordination, fundraising efforts, and the development of informational or marketing resources. Ultimately, the scope of involvement will be wholly determined by the community partner to fulfill a need within their organization.

HOW MUCH TIME CAN I EXPECT TO DEDICATE TO AN ORGANIZATION?

Placement-based CEL students are typically required to devote a minimum of 2 hours per week for 8-10 weeks during an academic term; however, the number of hours and duration of time spent in the placement varies from course to course. For project-based CEL, each student is expected to dedicate a minimum of 2 hours per week for approximately 8-10 weeks toward their work on the designated project. Students are not generally expected to be engaged in CEL service hours in the months of December and April as they are in exams at this time.

HOW WILL I BE EVALUATED?

Students can be evaluated based on the CEL involvement in many different ways. It is up to the discretion of the instructor to determine assessment and evaluation methods that align with students’ CEL endeavors and course objectives. Many assessment strategies have been developed and adapted specifically for CEL (Gelmon et al., 2001; Howard, 2001) to ensure academic rigor. Methods for evaluating students include but are not limited to:

- Reflective essays or papers
- Reflective journals
- In-class discussion
- Executive summaries or reports
- Individual or group presentations
- ePortfolio presentations
- Quizzes
- Online discussions
- Response papers
- Debriefing meetings
- Project notebooks
- Final synthesis of learning
- Research proposal
- Newspaper article
- Posters
WHAT EXPECTATIONS ARE PLACED ON ME AS A CEL STUDENT?

The work you are doing is very important and requires a real commitment to the people with whom you are partnering with and with whom you are serving. The university, your instructor, your peers, and most importantly the community partners and clients you serve are counting on you. As such, you are expected to act in a professional manner by:

- Being punctual and reliable (e.g., be on time and meet scheduled deadlines).
- Dressing appropriately – avoid wearing offensive, sloppy, revealing, or tight clothing. Consult with your community partner supervisor about appropriate attire within their organization.
- Participating in all activities that prepare you for your CEL role (e.g., understanding theory, site visits, risk management, planning, meeting with supervisors and group-mates, developing goals, organization volunteer orientation, etc.).
- Communicating Professionally (see Appendix B for Tips on Professional Communication).
- Appointing a liaison between student group and community partner to ensure effective, organized, and efficient communication with community partner (for project-based CEL).
- Employing effective teamwork and problem solving skills (see Appendix C for Tips on Group-work).
- Embodying the dual role of learner and service provider.
- Being prepared for phone or face to face meetings and service hours.
- Respecting diversity.
- Graciously accepting supervision and feedback.
- Respecting rules of confidentiality when dealing with sensitive or private information.
- Actively engaging in your service experience.
- Being proactive and flexible with your service and educational expectations.
- Engaging in regular and efficient communication with your community partner
- Producing high-quality work.
- Reflecting on the meaning of the experience to you personally, intellectually, and with respect to citizenship.
- Participating in respectful relationship building.
- Identifying possibilities for your future through the opportunities, experiences, and issues you have been exposed to.
- Asking questions – you are not expected to know everything! Make sure you have a clear understanding about the organization and particularly your role within it.

In addition to these expected behaviors, students are required to participate in CEL logs through myEL.uwo.ca to ensure that students are “on-track” with their CEL experience. This requirement is put in place for the benefit of the student as it encourages students to track their progress, thus preventing them from falling behind. Detailed instructions for completing CEL logs can be found in Appendix D.
HOW WILL MY CEL COMMUNITY PARTNER BE DETERMINED?

Before the commencement of any CEL course, a selection of community partners has already been recruited. Typically, the CEL coordinator will share information with each class about engaged community partners, and then subsequent matches will be determined based on students’ expressions of interest and learning motivations. Other methods for matching students with partners include interviews with your instructor or professional “speed dating”. It is important to note that the process for matching students (or groups) with community partners is at the discretion of the instructor and/or CEL coordinator and varies depending on the course. Please review Appendix E for questions to consider when choosing a community partner.

WILL I NEED A POLICE CHECK?

Many organizations require students to complete a Police Vulnerable Sector Check (PVSC) for Employment or Volunteer Purposes, with some exceptions applying. As such, students enrolled in a CEL course are encouraged to visit London Police Services at 601 Dundas St. to request a PVSC prior to the commencement of the course. This is at a cost of $40 to the student. However, if students are able to demonstrate financial need and are concerned about this additional cost, they may contact their CEL coordinator to discuss potential financial support for this process. Please visit the London Police Services website at http://www.police.london.ca for more information on the PVSC process and to download an application form to fill out prior to the visit to London Police Services.

APPENDIX A

COMMUNITY ORGANIZATIONS: GLOSSARY OF TERMS

BOARD
Those persons whose responsibility is to provide leadership and direction to the organization and govern the affairs of the organization on behalf of its members. “Board” usually refers to a board of directors, members of an executive, board of governors, or a board of trustees, administrators, leaders, coordinators, officials, participants, or anyone else involved in the governance or decision making of the organization.

CAPACITY
Human and financial resources, technology, skills, knowledge, and understanding required for organizations to do their work and fulfill what is expected of them by stakeholders.

COMMUNITY NEEDS ASSESSMENT
A process of involving citizens in both problem-solving and the development of local goals. The process is important because it not only allows people to learn more about the current state of their community, but also feel like they have a voice in shaping its future.

EXECUTIVE DIRECTOR (ED)
The most senior staff person in the organization. The executive director is responsible for the entire organization and reports directly to the board. The ED’s role is to support the governance of the board while ensuring that programs and operations of the organization are delivered.

SOCIAL CAPITAL
Connections among individuals – social networks and the norms of reciprocity and trustworthiness that arise from them.

SOCIAL ENTREPRENEURSHIP/SOCIAL ENTERPRISE
Use of entrepreneurial principles to organize, create, and manage a venture to address a social issue and/or make social change. A social enterprise does not measure performance in profit and return, but in social capital. This does not mean that social enterprise is incompatible with profit; however, social entrepreneurship is most commonly associated with the voluntary and non-profit sector, and the focus of social enterprise is to further social goals, rather than accumulate profit.

VOLUNTEER RESOURCE MANAGEMENT
Practice and profession of leading teams of individuals (volunteers) to support and enhance core programs and services of an organization.

APPENDIX B

TIPS FOR PROFESSIONAL COMMUNICATION

COMMUNICATION ETIQUETTE
Developing positive first and lasting impressions is an important skill for your CEL course and for future personal and professional endeavors. As such, students are expected to demonstrate professional communication skills when interacting with their community partner and CEL faculty and coordinators. Students should be able to express their ideas, and any questions or concerns they have both clearly and articulately to ensure a successful CEL experience. With that being said, communicating with a community partner or faculty member for the first time can be challenging for some students. Below are some helpful strategies and examples for effective communication:

Before initiating contact with your community partner, do your groundwork:

• Learn about your community partner organization.
  • What is their mission? Values? What programs and services do they provide? What population do they typically serve?
  • Knowing about your organization prior to contact shows your interest and that you can take initiative.
• Be acutely aware of your schedule – know the dates and times when you can serve, and when and by what means (e.g., phone, text, email) that is best to contact you.

When making contact with your community partner:

• It is a good idea introduce yourself via email or phone prior to your first scheduled meeting, unless instructed otherwise.

When calling or emailing:

• Identify yourself as “a Western University student from _______CEL course who is contacting you about ________.”
• If you reach voicemail, leave a professional message indicating your name and contact information and the information listed above.
• If you are emailing, use professional email etiquette (see below).
• BE PROACTIVE – if you don’t hear back from the community partner after your first attempt to contact, then try again or ask for assistance from your instructor or the CEL coordinator. DO NOT let time pass and delay your service hours.
APPENDIX B CONTINUED

EMAIL ETIQUETTE
It is important to remain professional at all times even when communicating via email. Throughout your CEL experience and in any future professional email communication you should employ the following strategies:

• Use formal introductions and salutations (e.g., Dear _____, Dear Dr. _____, Dear Mr. or Mrs. _____, Hi _____, Hello _____).
• Always use proper spelling and punctuation.
• Avoid spelling shortcuts commonly used in text messages (e.g., type out “you” and “are” instead of using “u” or “r”).
• End the email positively (e.g., Best, Take care, Regards, etc.).
• Include a signature line that provides your contact information (i.e., Name, University affiliation, candidate for BA/BSC, email, and phone number).

Adapted from the Service Learning Best Practices: Advice for Serving with Community-Based Organizations for Students in Direct Service Learning and Hybrid Courses from the Center of Community Service at Northeastern University http://www.northeastern.edu/serviCELearning/involvement-2012-edition
APPENDIX C
TIPS FOR EFFECTIVE GROUP WORK

1. **Listen, and not just hear:**
   - Actively listen to what your group members have to say.
   - Avoid interrupting.
   - Clarifying your understanding by paraphrasing and summarizes others ideas.
   - Ask group members to encourage all voices to be heard.

2. **Establish a common goal:**
   - Brainstorm to determine a shared objective.
   - Ensure all members understand and share the same overarching goal and/or vision.

3. **Outline your objectives:**
   - Outline and make clear what you hope and plan to accomplish.
   - Define short- and long-term objectives and goals.

4. **Assign roles:**
   - Every group member possessed unique strength and weaknesses – share yours with your group, learn about theirs, and assigns roles that are a best-fit.
   - Some roles in a group are leader, organizer, editor(s), researcher(s), writer(s), trouble-shooter/brainstormer, and presenter(s).

5. **Create a timeline/schedule:**
   - Establish a timeline for meetings, events, and deadlines.
   - Be specific about dates and times.
   - Be clear about who is expected to do what and when.

6. **Divide to conquer:**
   - Break project into smaller, manageable tasks.
   - Assign separate tasks to individuals or sub-groups.

7. **Avoid “groupthink”:**
   - Working in groups does not mean conforming to groups.
   - If you disagree with a decision or direction the group is going – speak up.

8. **Exchange contact information:**
   - Generate a list of phone numbers and emails.
   - Determine and share with each other the best modes and times to contact.

9. **Resolve conflicts effectively:**
   - Conflict is a natural and healthy part of group work when managed effectively.
   - Avoid having “winners” and “losers” in conflict – practice compromise.
   - Resolve conflicts immediately to ensure they don’t impact productivity and group morale.
APPENDIX D

INSTRUCTIONS FOR COMPLETING CEL LOGS

COMMUNITY SERVICE LEARNING HOURS TRACKING APPLICATION

The CEL Hours Tracking application is to serve as a record of the contributions you, as a Western student, have made to the London community and beyond through Community engaged learning.

Since you are engaged in Community engaged learning as part of your course, this will allow your faculty member to track your progress, CEL @ Western to help you ensure your community work is of benefit to you and the community, and for CEL @ Western to collect statistics of the ways that students are “giving back” to our surrounding communities.

Students who are completing CEL as part of a course will be asked to report on their service work in 2 week time blocks. The CEL Hours Tracking application can be accessed through two ways:

1. Visiting www.myEL.uwo.ca – this page will say “Not Logged In” and say that you have entered an invalid log in. Please ignore this. Select your role (student) and log in with your Western Student ID and Password.

2. Visiting Western’s Career Central (www.westerncareercentral.ca) – Log on using your Western Student ID and Password and the Hours Tracking Module can be accessed through the “Experience Tab”, with the “CEL Logs” link.

Once you are logged in, select “Complete A CEL Log” and you will be prompted to input some information about your CEL activities Please keep your entries brief but please use full sentences. We do not expect any more than 2 to 3 sentences.

You will receive a schedule of reporting periods from the CEL coordinator. Please complete these logs in a timely fashion, as the system will not allow you to enter information retroactively beyond 2 weeks.

If you have any questions or problems with the module, please contact your Community Engaged Learning Coordinator.
Appendix E

Choosing the Right Community Partner

Finding a good-fit with a community partner can greatly impact your CEL experience. It is important that you carefully consider the following questions before determining your placement:

- What are my learning objectives? What do I hope to gain from this CEL experience?
- What issues or causes really concern you?
- What time restrictions do you have (e.g., particular days/evenings)?
- What transportation arrangements can you make (e.g., bus, car, carpool)?
- What are your strengths, skills, and abilities? Weaknesses?
- What skills would you like to develop?
- What type of environment do you prefer to work in (e.g., indoor/outdoor; structured/unstructured; independent/group)?
- What type of commitment would you prefer (e.g., once a week; independent work; intense several day event)?
- Do you prefer to work with any particular age group?
- Are there particular populations you are interested in working with? Conversely, are there populations you would not be comfortable working with?
- Do you prefer working independently, one-on-one, or in a group setting?

Adapted from the Community Service Learning Student Guidebook at the University of Alberta (www.CEL.ualberta.ca)
